REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a digital recording apparatus that obtains a digital stream including a plurality of frames, while recording the digital stream on a digital recording medium. The independent claims identify the uniquely distinct features "an execution permitting unit operable when the discrimination unit recognizes that the receiving unit has received the instruction for the recording pause to (1) immediately permit the execution of the recording pauses in case that the number of frames included in the first object is the predetermined number or more and (2) wait for the number of frames included in the first object to increase to the predetermined number or more and then permit the execution of the recording pause in case that the number of frames included in the first object is less than the predetermined numbers." The closest prior arts, Miki (US Pat. No. 5,107,481), Montie et al. (US PG Pub 2002/0008929 A1), Baryla (US Pat. No. 5,717,468) and Gotoh et al (US Pat. No. 6,314,235) discloses a recording method, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
